

Pollinator Monitoring Survey

Surveyor's Name: _____
 Date: _____
 Site Location: _____

Shade Temp: _____ (should be at least 20 °C)
 Wind (circle one): calm light air light breeze gentle breeze

Sky (circle one): clear partly cloudy bright/overcast
 Observation start time: _____
 Observation end time: _____

**** Monitoring tips:** Surveys take 20 minutes. **Count only pollinators that are foraging on flowers.** Stand so that you don't cast a shadow. Temp should be at least 20 degrees. Do not count on a cloudy or windy day. Wear light colored clothing. Move slowly through the landscape. Look at flowers from all angles... some insects might be deep inside the flower and the small ones are hard to see.

Functional Group	Tallies	What flowers are the insects foraging on?
Bumblebees		
Honeybees		
Pollen pants bees Tiny dark bees, striped & green metallic sweat bees, striped mining bees, long horn bees		
Hairy Belly Bees Striped and metallic		
Flies		
Wasps
